Universal Touchscreen Timer

M-Wave Controls MC5000 Universal Touchscreen Timer

The MC5000 is the ultimate process timer for the commercial kitchen. The combination of touch screen technology and a high brightness color LCD provides total flexibility of use. Process timers are identified with user selected icons, not text. Process progress is indicated by a large time remaining display and colored borders around the timer buttons. An audible alert with user programmed process messages displayed on the panel guide the operator through the timing sequence. A durable stainless steel package and simple snap-in mounting bracket allow the timer to be placed wherever process control is needed.

Features:

- 7+color WVGA display with touch screen
- 8 programmable process buttons
- Processes identified with user selected icons
- Each process button can be programmed to have up to 4 timed operations and messages
- Create your own custom process menu, including icons, using any spreadsheet application
- Load your custom menu into the timer via the host USB interface
- Edit your menu via spreadsheet application or timer program mode
- Numeric countdown of process nearest completion along with highlighted process button
- Audible alert sounds at process time out
- Low voltage operation for simplified installation
- Timer snaps into bracket, no tools required
- Rugged stainless steel package

Specifications:

Input Voltage: 90- 270 VAC 50/60 Hz
into supplied outlet power supply

Power Consumption: 20 watts maximum

Operating Temperature: 32- 150° F
